PROFESSIONAL SUMMARY

Aspiring Data Analyst with 2 years of business analysis experience and a strong foundation in data-driven decision-making. Pursuing a Master of Science in Business Analytics, where I am building advanced analytical and AI-driven problem-solving skills to translate data into strategic business value. Passionate about the intersection of AI and analytics and currently developing an AI automation startup focused on streamlining operations in the dental industry.

EXPERIENCE

GRAY'S ANALYSIS INC

Worcester, MA

Business Analyst Intern

June 2024 – January 2025

- Executed structured data entry to support a large-scale system migration, ensuring data integrity across regulatory databases
- Conducted end-to-end process mapping that identified ~10% faster data validation steps for regulatory submissions
- Developed 25+ SOPs and work instructions, enhancing documentation accuracy

KHUU MANAGEMENT

San Jose, CA

Asset & Portfolio Analyst Intern

August 2023 – May 2024

- Researched real estate market trends to generate an analysis to improve company operations
- Assessed the potential future value appreciation of each property and how they can maximize returns
- Evaluated the total return, average cash-on-cash, and internal rate of return

HIPONA DENTAL CARE

San Jose, CA

Front Desk Manager

May 2020 – September 2023

- Managed daily operations for 200+ clients per month on a recurring basis regarding their treatment plans and financial arrangements
- Built an AI insurance verification startup, automating eligibility checks and reducing manual workload for dental offices
- Recorded profits and losses in databases and sorted financial documents in the company's filing systems

PROJECTS (ALL CONDUCTED DURING 2025-2026)

PCOA MOVIE RECOMMENDATION SYSTEM

Orange, CA

- Built a mood-based film recommendation system using PCoA on 8,000 films across 248 IDF-weighted trait features, enabling dynamic multi-rail content placement for streaming platforms.

SWIMMING VIDEO ANALYSIS

Orange, CA

- Built an AI-driven swim performance analytics platform using the Gemini API, BigQuery ELT pipeline, and ridge regression to predict 100y breaststroke race times from video-extracted biomechanics data.

PEOPLESOFT ENROLLMENT OPTIMIZATION

Orange, CA

- Designed a filter priority queue system within Oracle PeopleSoft to automate prerequisite and GPA validation, reducing advisor administrative workload by 200+ hours per semester and eliminating manual enrollment errors for 8,000 students.

EDUCATION

CHAPMAN UNIVERSITY, GEORGE L. ARGYROS COLLEGE OF BUSINESS & ECONOMICS
